### SMARTCOIL™ TECHNOLOGY SMALLER IS SMARTER

Long ago the HVAC industry determined that the combination of copper tubing and aluminum fins provided the most efficient transfer of thermal heat available. Today, the Goodman brand has improved upon this industry standard by making the condenser coil copper tubing smaller and smarter.

The result is a heat pump unit that can offer high efficiency, use less refrigerant, and deliver money-saving and energy saving comfort to you for years and years.

### PERFORMANCE

UP TO  
**16**  
SEER

UP TO  
**9.5**  
HSPF

"SEER" stands for Seasonal Energy-Efficiency Ratio, which is a measurement of a heat pump's cooling efficiency developed by the U.S. Department of Energy. It's a simple formula: the higher the SEER of your unit, the greater its efficiency – and the lower your operating costs. "HSPF" stands for Heating Seasonal Performance Factor, which measures the heating efficiency of a heat pump.

Independent, dependable, courteous, prompt, honest, highly-skilled and respectful of you and your home. That's why all the time homeowners say,

***"THE DIFFERENCE IS CRYSTAL CLEAR."***
